

StackPack Blast Skid

EQUIPMENT FEATURES

- Solid state 24VDC blasting controls
- 4-Wire deadman switches and big mouth choke features with remote blast/blowdown/choke
- Specialized controls allow each pot to be individually depressurized and maintained off-line while other pots remain in operation
- Stainless steel control panel
- Heavy duty skid with ISO box corners for lifting eye attachments

PRODUCT SPECIFICATIONS

- 350 cu. ft. (48 Drums Steel Grit) working capacity
- Six individual 6.5 cu. ft. pots, each includes: 6" power pop-up inlet, 1 ½" oversized air piping, tungsten grit valves, ADI quick release union end ball valve, manual blowdown
- All pots rated for 175psi
- Pot is not pressurized for blowdown, saving compressed air

OPTIONS

- 3500cfm Air Dryer Skid with aftercooler and oversized desiccant tank
- Forklift pockets on heavy duty skid
