

Negative Air Machines

EQUIPMENT FEATURES

- High capacity HEPA filters
- 12" discharge
- Two-ply ring panel secondary filter
- ½ poly pad primary filter
- Motor: thermal protection, sealed lubrication, two speed
- Filter placement that insures uninterrupted airflow and equal displacement of filtration
- Air-tight construction prevents leakage and allows for uninterrupted filtration
- Lock-in-place filter that eliminates by-pass of contaminated air
- Meets specs and exceeds the standards of the EPA, OSHA, NEC, and ANSI

PRODUCT SPECIFICATIONS

- Air capacity: 2000 cfm (high), 1000 cfm (low)
- 115 volts, 60 Hz, 13 amps
- Weighs 160 lbs
- Aluminum construction
